

# Geography in Year 1!

**Learning:** Know what a compass is, and how and why they are used. Identify the compass points and use them during directions.

Year 1 have been busy being Geographers through the use of compasses. They began by discussing who would use a compass and why they are important. They now know the main compass points of N,E,S and W and were able to direct each other to find objects around their classroom!

*It was so much fun and everyone worked as team!*

Academic Year: 2021/22
