

PLANTS

Year 1 worked closely with Back on the Map to plant their own sunflowers. They decided between dwarf and giant sunflowers. We thought about how we are going to measure their growth and have learnt about the functions of each part of the plant.

Year 2 have planted sunflowers and cress! They planted cress seeds and placed them in a cupboard with no water or sunlight. They are going to observe the changes overtime and see if the cress can survive without water and sunlight.
